

### *HYPER Disc Brake Hub / Front Fork Compatibility Check*

This method is pretty ghetto, but it works.

Step 1: Print out this document on A4 paper with no scaling.

Step 2: Use a ruler or tape measure to check the printed ruler above matches your physical ruler.

Step 3: cut out the hub diagram and place in your fork to check clearance.

Step 4(a): It fits!! Hooray! Head on over to [winspace.cc](http://winspace.cc) and buy some HYPER wheels.

Step 4(b): It doesn't fit! :( Head on over to [winspace.cc](http://winspace.cc) and buy a new frame, fork and HYPER wheels. ;)
