

Statement of “ Lún will upgrade to free change carbon spokes’ service”

Winspace is committed to environmental protection and practices 'Green Production' to achieve the goal of energy conservation and emission reduction. We have established an enterprise culture focused on the relationship between humanity and nature, and we continually promote green and low-carbon development. Achieving carbon neutrality is a solemn promise China has made to the world, and it represents a broad and profound economic and social change that cannot be achieved easily. As a pioneer in the carbon fiber bicycle manufacturing industry in China, Winspace is obligated to act as an advocate for environmental protection.

This statement informs you that, starting from March 20, 2023, Winspace will no longer provide spare carbon spokes with the wheels' packaging for the Lún-Hyper series. Instead, we will provide more professional and convenient after-sales service to reduce carbon emissions caused by overproduction.

- a) Spare carbon spokes will no longer be provided, and all other accessories will be included on the wheels' packaging as before.
- b) If your Lún-Hyper series products require carbon spoke replacement due to damage or quality issues, please contact us at service@winspace.cc. We will evaluate the wheels and send you the replacement spokes free of charge.

Thank you for your support and trust in us. Lún aims to work with you to reduce carbon emissions and achieve the goal of sustainable development.

XIAMEN WINSPACE CYCLING
